DETAILED ACTION

Information Disclosure Statement

1. The information referred to in the information disclosure statements filed on 3/23/07 has been considered as to the merits.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 5-26 are rejected under 35 U.S.C. 103(a) as being anticipated by Nishino (4,738,427) in view of Niezoldt (5,791,738). Nishino discloses a seat for a vehicle (Figure 3): comprising: a pair of support frames (8)(8) supported by the vehicle body; a seat back (1)(A) including a seat back frame (1); a reclining device (6) configured to allow the seat back (1)(A) to tilt and support the seat back (1)(A) in a tilting position, the reclining device (6) being supported by an installed on the support frames (8)(8); and a lifter device (3) configured to allow a seat cushion portion (2)(A) to tip up and support the seat cushion portion (2)(A) in a tipping position, the lifter device (3) being supported by and installed on the support frames (8)(8) wherein the reclining device (6) comprises a device mechanism and covers lower ends of the seat back frame (1) as best depicted in Figure 3. The lower end of the seat back frame (1) is supported

10/509,569

Art Unit: 3636

The lifter device (3) comprises a first sector gear (20) and a second gear (19) to allow the seat cushion portion (2)(A) to tip up and support the seat cushion portion (2)(A) in a tipping position. The lifter (3) further comprises a first projection (17) and a second projection (22) on an inner portion (unlabeled) of the first and second support members (8). The gear (second gear) (19) is pivotally supported on the first projection (17) and the sector gear (first gear) (20) is pivotally supported in the second projection (22).

As disclosed above, Nishino reveals all claimed elements with the exception of a seat back frame made from a pipe/tube and sub-frames welded to the seat back fame and also made from pipes/tubes, wherein each lower end of the frame and sub-frames is spaced in the fore-aft direction and the reclining device falls within the space.

Niezoldt (5,791,738) discloses a seat back (1) including a first tubular/pipe frame (4) and a second tubular/pipe frame or sub-frame (3) having lower ends that are spaced apart in the fore-aft direction and a hook element (12) for receiving a reclining device, in the form of a swivel pin, which falls within the space between the lower ends of the first and second tubular frames. An upper end of the sub-frame (3) is welded to an upper portion of the seatback frame (4). The first (4) and second (3) frames are welded together at top portions (7)(6) as described in column 2, lines 35-40. A third frame (13) is welded at its ends to the first and second frames at a lower end thereof by way of hook element (12) which extends rearward of the lower ends of the first and second frame sin a fore-aft direction.

Application/Control Number:

10/509,569 Art Unit: 3636

It would have been obvious to one of ordinary skill in the art at the time of the instant invention to replace the seat back (1)(A) disclosed by Nishino with the seat back taught by Niezoldt. Such a modification would create "a considerable increase in the seat back's stability under load both towards the front and the back" (column 3, lines 2-3).

Response to Amendment/Arguments

4. The amendment filed on October 3, 2007 has been considered in its entirety.

Applicant argues that Nishino, alone or in any proper combination with Neizoldt, fails to disclose a seat for a vehicle comprising a seat back including a seat back frame made from a pipe and sub-frames made from pipes, upper ends of the sub-frames being respectively coupled to the seat back frame, lower ends of the seat back frame and lower ends of the sub-frames being supported by the supports frames. Nishino discloses a seat back frame that is supported at is lower end by support frames (8). Niezoldt discloses seat back (1) including a first seat back frame member (4) with sub-frames (3) spaced in a fore aft direction from the first seat back frame member (4). The lower ends of the sub-frames (3) are spaced from the first seat back frame member (4) and the upper ends of the sub-frames (3) are coupled to the first seat back frame member which is connected to the first member (4) and the sub-frames (3) by way of hook elements (12) at ends thereof. The Examiner contends that the sub-frames disclosed by Neizoldt do have upper ends. These upper ends correspond to the point where sub-

10/509,569

Art Unit: 3636

frames (3) contact frame (4). The term "end" does not necessarily imply a "free end", it simply implies the end of a section. The point at which sub-frame (3) meets first frame member (4) constitutes an end of a section and therefore meets the limitation of an "upper end." Replacing the seat back frame disclosed by Nishino with the seat back disclosed by Neizoldt would result in the structure as claimed.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
